# **WORKSHOP EDITION**

September - October 2004

# 2004-2005 COLORADO NATIVE PLANT SOCIETY WORKSHOP PROGRAM Mignon Macias, Workshop Committee Chair

Thanks to so many wonderful Colorado Native Plant Society Members, we have another exciting workshop season this year. Six workshops have been organized to take place this season. Boulder, Denver and Colorado Springs are the locations for the workshops. Some of the upcoming workshop topics include

Paleobotany Mosses of Colorado Beginner Plant ID Mycorrhizal Associations

#### Registration Information

This year, announcements and registration will be handled in a different manner from previous years. Workshops will be announced at three times - in the fall (September/October), winter (February/March) and spring (April/May) newsletters. Registration is **mail-in only** and requires **payment at the time of registration**. The fee for attending a workshop for members is \$12/session. Non-members pay a one time fee of \$27 for the first session (which includes a year membership) and \$12 for each subsequent session. **THE REGISTRATION FEE IS NON-REFUNDABLE.** 

To register, please include workshop title, your name, address, telephone number, email address and an address label. Registration can only be processed with all of this information. Include the workshop fee of \$12 (members) or \$27 (non-members) and mail to

Workshop Coordinator-Mignon CONPS P.O. Box 200 Fort Collins, CO 80522

For those of you who must cancel at the last minute, we appreciate your \$12 contribution to CONPS and ask that you email or call Mignon Macias, mignonmacias@mindspring.com or 303.249.2977, so she has an opportunity to fill your spot.

Workshops have always been very popular and often we have been unable to accept everyone. Please help us accommodate all those who wish to attend a workshop.

## **Workshops**

# VIOLACEAE OF COLORADO

Leaders: Tass Kelso & Bill Jennings
Location: Colorado College, Colorado Springs
First Session: November 6, 2004
Second Session: November 7, 2004
Time: 9 am to 3pm

Tass Kelso and Bill Jennings have been studying the violets of Colorado for the last several years. As a result of these observations, they have some new ideas about the classification and nomenclature of Colorado's violets, as well as tips for identification. It appears that many of the species attributed to Colorado are part of polyploid complexes and may be better treated by grouping similar forms under the same name. Under this approach, only about 15 taxa actually occur in Colorado in two genera (Hybanthus and Viola). Learn about this group which reproduces by seeds, stolons, and cleistogamous (self-fertilizing) flowers, producing a bewildering array of forms, often in the same population

PLANT ECOLOGY: BEGINNING SOILS
Leader: David Buckner
Location: Foothills Nature Center, Boulder
First Session: January 15, 2005
Second Session: January 16, 2005
Time: 9 am to 3pm

An understanding of the ecology of native vascular plants of Colorado requires an understanding of the nature of the soils that they occupy. This workshop will take an elementary look at the major physical, chemical, and biological properties of soils and how these affect the distribution of vascular plants. Geology, geomorphology and biological modification also bear on the ecological nature of growth media in western landscapes. The participant will be offered the basics of these properties and processes along with examples of how plant community and individual plant species' occurrence are affected. There will be selected hands-on learning opportunities available during the day.

Watch for more workshop announcements in upcoming newsletters.

# **Society Announcements**

## **Annual Meeting Results**

For those of you who did not attend the annual meeting, it was an exceptional event. Karen Vail did an excellent job on the arrangements. Many thanks to her and all those who helped her, including Dick and Marty Fisher, and John Proctor.

CONPS members elected six board members - five will serve a two-year term, and the sixth will fill the remainder of Pat Ploegsma's term (until September 2005). Newly elected board members, serving two year terms, are

Jennifer Ackerfield John Giordanengo Brad Johnson Gwen Kittel Jan Loechel

Laurel Potts will serve the remainder of Pat Ploegsma's term.

Additional information on the annual meeting, including the Society Awards and the silent auction, and the new board members will be in a future newsletter issue.

#### **Board of Directors**

At the board meeting on Sunday, the Board approved the dual position of Chapter President and Treasurer for Naomi Nigro, the new Denver Chapter President, as well as elected officers for the coming year. Officers for 2004/2005 are

Laurel Potts - President Dave Anderson - Vice President Kim Regier - Secretary Naomi Nigro - Treasurer The Board designated the following dates for Board meetings:

November 13

January 8

March 5

April 9

May TBD, West Slope

Final meeting locations will be available by contacting Kim Regier, 303-556-8309, or kimberly.regier@cudenver.edu.

#### **Sales Committee**

The Sales Committee is looking for members interested in being part of the Book Sales Committee. We need someone to work with Amazon.Com and also explore ways to increase sales for the Society. Additionally, we need a member to help coordinate the Used Book Sale planned for early next year. Please consider this opportunity to help your Society. Contact April Wasson to volunteer, 303-763-7679 or apriladw@earthlink.net.

## **Southeast Chapter**

The Southeast Chapter is recruiting for Chapter President. For information on duties or to volunteer, please contact Doris Drisgill, Ddrisgill@cs.com, 719-578-1091, or George Cameron, gpcameron@juno.com, 719-634-4431.

# Message from the President

#### Welcome and Thanks!

The Colorado Native Plant Society's Annual Meeting, held in September, is a time of elections where we vote for new Board of Directors members and Officers. This year we have two officers passing the torch after holding office for FOUR years each. These outgoing stars are President Jill Handwerk and Treasurer Georgia Doyle. Many thanks to both as well as departing Board Members Mark Simmons and Neil Snow. I'm serving as President and our new Treasurer (and Denver Chapter President!) is Naomi Nigro. Dave Anderson and Kim Regier have graciously agreed to continue as Vice-President and Secretary respectively.

Congratulations to Society Award recipients Carolyn Crawford, Lifetime Membership; and Andy Kratz and Pat Ploegsma, Special Merit Awards.

Welcome to the new "crop" of Directors: Jennifer Ackerfield, John Giordanengo, Brad Johnson, Gwen Kittel (returning), and Jan Loechel. I look forward to working with all of them and continue great work for Colorado's flora.

#### Laurel Potts

# Botanical Article CALCIPHILY

Dr. David Buckner, Plant Ecologist

The affinity of some plant species for calcareous substrates is one of the oldest observations in ecology (Warming 1909, Schimper 1903, Thurmann 1849), having originally been studied in the Calcareous Alps of central Europe. In Colorado, the phenomenon has been documented most prominently from Hoosier Ridge between Fairplay and Breckenridge. There, the Leadville Limestone is the location of occurrence of several rare plant species. Some of these are disjuncts, i.e. plants that occur in far disjunct geographic locales, in varying degrees of commonness. Others are endemics (plants that occur in a single relatively confined area and nowhere else) that may have evolved since geographic separation from related plants after climate change removed suitable habitat in between.

To varying degrees, plants tolerate scarcity of essential resources, such as nutrients. Those least tolerant of the scarcity of a given nutrient are likely to be most abundant where that nutrient is present in abundance. As a consequence of low availability of the nutrient in the general landscapes of a region, species least tolerant of scarcity may be found only on the few sites where the nutrient is available in sufficient amounts. If the nutrient in question is calcium, then sites of greatest abundance are likely to be those where the geologic parent material is rich in calcium, especially limestone or gypsum sites.

In zones of high precipitation, water percolating through the soil removes or leaches many cations, including calcium, out of the root zone. Fortunately, calcium is added to soils at a small rate as minerals weather and decompose through natural chemical processes. In arid and semi-arid environments, calcium produced by weathering actually exceeds leaching losses and the element can accumulate, resulting (along with the presence of other cations) in "alkaline" soils that are widespread in western North America. Consequently, under present climatic conditions in Colorado environments, the abundant availability of calcium is widespread in natural soils and not confined to lime-

stone/gypsum sites except in a few areas where precipitation is high and soil leaching is active. In the context of high subalpine and alpine environments, where typical annual precipitation may exceed 30 inches per year, soil leaching actually is strong enough to effect calcium depletion. High altitude soils of Colorado are commonly possessed of features related to strong leaching, not the least of which is generally lower pH. Thus, high-altitude occurrences of Leadville Limestone in Colorado, such as at Hoosier Ridge, may represent sites of significantly greater biological calcium availability

It should be noted that "calciphily" is not a phenomenon confined to, or exclusively associated with, rare plants. It merely suggests an affinity for calcium. Common species may have their distributions adjusted by the presence of varying amounts of calcium also. For example, the position of the upper limit of growth of Engelmann spruce (*Picea engelmannii*) and subalpine fir (*Abies lasiocarpa*) in the Tenmile Range of central Colorado has been observed to be adjusted by the local position of the boundary between calcareous and non-calcareous soil parent material (Curry 1962).

## **AQUILEGIA DEADLINE - NOV. 10**

Submit contributions for Vol. 28, No. 5 by Nov. 10, 2004. Articles less than 1000 words are especially welcome. Previously published articles submitted for reprinting require permission. Submit via e-mail or on disks as an MS Word or rtf document. See page 7 for additional information.

# **CHAPTER NEWS**

# **Boulder Chapter**

Monthly meetings are the on the second Thursday of the month at 7 PM at the City of Boulder Open Space and Mountain Parks offices in the north building conference room, 66 South Cherryvale Road. From South Boulder Road, go south on Cherryvale 1/10 mile and turn west onto a lane to the offices. Contact Tommi Scanes, scanesclan@comcast.net or 303-682-1208.

October 14 GIS and Remote Sensing. Dr Karl Brown will talk to us about using technology to further botanical and ecological interests by the use of GIS and Remote Sensing in the USGS-NPS Vegetation Mapping program.

November 11 Xeriscaping with Natives in Colorado. Jim Knopf. We will have his books available for autographing.

December 9 Potpourri of Flower Pictures with Peripatetic Ecological Annotations. Dr. David Buckner.

January 13 Boulder County's Rare Plants. Ann Armstrong

**February 10** The Wonderful World of Common Names. Ron West, Boulder County Open Space Department.

Mar. & April Topic TBA.

May 12 Annual Picnic

# **Fort Collins Chapter**

Month meetings are held at 7 PM at the Gardens on Spring Creek, 2145 Centre Ave. Ft. Collins. Dinner with the speaker will be at 5:15 pm at The Rainbow on Laurel St. Please contact Annette Miller the day before if you will join us for dinner. Leave a message at 482-3063 or 495-3240 or almiller@lamar.colostate.edu.

October 13 Cheatgrass Control and Community Restoration in Rocky Mountain National Park. Helen Rowe. Leadership election for the chapter.

November 3 Conservation of Rare Plants of Colorado. David G. Anderson, Colorado Natural Heritage Program.

December 7 Effects of Deicers on Tree Physiology and Seed Germination. Nicole Trahan.

February Soil Seedbank Studies in Teddy Roosevelt National Park. Julie Laufmann.

March Rare Plants of Larimer County. Georgia Doyle and Dave Anderson.

April Native Plants for Landscaping.

# **Metro-Denver Chapter**

Monthly meetings are held September through April at 7 PM in the Waring House at the Denver Botanic Garden (the mansion just south of the main entrance on York Street). To enter, head south on York past the Gardens main entrance. Make an immediate right into parking lot that says "Staff Parking." Members are invited to join speakers at 5:30 PM for pizza at Angelo's, 620 East 6th Ave (between Pearl and Washington) in Denver. For more information, contact Chapter President Naomi Nigro, 303-366-6033, or email naomi4CoNPS@hotmail.com.

The Use of October 26 Morphology Genetics and in Determining Relationships within a Desert Sunflower Genus. Shannon Kuchel Fehlberg, a graduate student at the University of Colorado at Boulder, will discuss morphological and adaptive variation in the sunflower genus Encelia, and compare it to genetic variation based on DNA sequences.

December 7 Shock and Awe: Weapons of Botanical Defense. Fran Blanchard and Mary Ann McMullen, the Plains Conservation Center, will lead us on a revealing adventure into the world of "botanista" rebels. Engage with seemingly innocuous plants, armed to their apical meristems with chemical, biological, physical and mechanical defenses. You will never walk past a plant with the same non-chalance. LOCATION: DBG, Gates Hall.

January 25 Gardening with

**Natives.** Mikl Brawner, Harlequin's Garden of Boulder.

February 22 Denver's Natural Areas Program. Gayle Weinstein. The Natural Areas Program selects sites throughout Denver that retain or have the potential to reestablish fundamental natural features that existed prior to early development.

March 22 Pakistan. Dr. Dan Johnson, Curator of Native Plants at DBG. will give a presentation on his 2001 trip to Pakistan, where "...the varied landscape only hints at the rich flora of the region, from the bristling mounds of Acantholimon lycopodoides the to windswept Betula utilis at treeline."

**April 26 Topic TBA.** .Dr. Leo Bruederle, the University of Colorado at Denver.

# **Plateau Chapter**

Chapter activities are scheduled throughout the year. For more information, contact Chapter President Jeanne Wenger at 970-256-9227, stweandjaw@acsol.net or Program Chair Lori Brummer at 970-641-3561, lbrummer@gunnison.com.

# **Southeast Chapter**

Activities are scheduled throughout the year. The chapter is recruiting for the office of President. For chapter information or to volunteer, contact Doris Drisgill, Ddrisgill@cs.com, 719-578-1091, or George Cameron, gpcameron@juno.com, 719-634-4431.

# **Southwest Chapter**

For news and activities, contact Chapter President Sandy Friedley at 970-884-9245 or by e-mail at friedley@mydurango.net.

# Aquilegia via Email

Aquilegia is available via email. Send your email address to Eric Lane, eric.lane@ag.state.co.us, or Alice Guthrie, molly82@earthlink.net.

# Aquilegia

The Colorado Native Plant Society is a nonprofit organization dedicated to the appreciation and conservation of the Colorado native flora. Membership is open to all with an interest in our native plants, and is composed of plant enthusiasts both professional and nonprofessional.

Please join us in helping to encourage interest in enjoying and protecting Colorado's native plants. The Society sponsors field trips, workshops, and other activities through local chapters and statewide. Contact the Society, a chapter representative, or committee chair for more information.

#### Schedule of Membership Fees

Life\$250
Supporting
Organization or Corporate\$30
Family or Dual
Individual
Student or Senior

### Membership Renewal/Information

Please direct all membership applications, renewals, and address changes to the Eric Lane (Chair of Membership), Colorado Native Plant Society, P.O. Box 200, Fort Collins, CO 80522. Please direct all other inquiries regarding the Society to the Secretary at the same address.

Aquilegia is published four or more times per year by the Colorado Native Plant Society. This newsletter is available to members of the Society and to others with an interest in native plants. Articles for Aquilegia may be used by other native plant societies or non-profit groups, if fully cited to author and attributed to Aquilegia.

Articles not exceeding 2000 words in length and shorter items fewer than 500 words in length, such as unusual information about a plant, are especially welcome. Previously published articles submitted for reprinting require permission. Camera-ready line art or other illustrations are also solicited. Please include author's name and address, although anonymity may be requested. Articles submitted via email or on disks (IBM preferably) are appreciated. Please indicate word processing software and version; if possible, submit as an RTF (rich text format) file.

Please direct all contributions to the newsletter to:
